EXPERIENCE

Unitech Global Resource: NG, SA— Telecoms Support Engineer (NYSC) [unalobal.net]

AUG. 2019 - PRESENT

- I am in charge of planning for points to multipoint (PMP) base stations as well as point-to-point (P2P) sites for our customer company (**MTN Nigeria**) while ensuring visible line of sight and accurate Redline microwave link configuration using Pathlos 5.
- I use App Engine Standard with Python runtime in managing SaaS software applications running on Unitech Global Google Cloud Organization account.
- My daily activities include providing remote support as regards installation, integrating of Redline microwave radios.
- I help in spinning up NGINX servers for multiple workload runtime.
- Communicating and managing resource personnel on a rolling basis so as to achieve project scope and objectives as well as assuring that we maintain the SLA's of our microwave telecoms build Infrastructure.
- I help troubleshoot and configure redline radios via remote support for Engineers who encounter difficulty on-site.

Urbane Aires — Digital Media Associate (http://urbane.ariesmoda.com)

JAN. 2018 - JUN. 2019

- I worked with internal creative services, external agencies, and specialized content partners to develop content for the web and social media.
- I functioned in a lead generation and brand to the customer phasing team.
- Worked with our customer's marketing team to determine content goals and distribution methods for the business.
- I developed and optimized blog content for SEO
- Lead the team that develops storytelling content and opportunities for new product and seasonal launches.
- Coordinate content development calendar for both day-to-day and long-term efforts.
- Developed editorial calendars for projects and ensure deadlines are met.

PRO JECTS

$\textbf{Text to Speech Web App} \ - \textit{lhttps://book2speech.herokuapp.com/} \\$

JAN. 2019

• Due to my interest in Natural Language processing. I played around Google ML engine and ML API's which led me in building this text to speech application.

PROFESSIONAL CERTIFICATION

Google IT Support Certified — Google IT Support Certification

• The course training taught me modern networking technologies and protocols and an overview of the cloud to practical applications and network troubleshooting. I was able to grasp powerful network troubleshooting tools and techniques, learn network services like DNS and DHCP that help make computer networks run. I understood cloud computing on a different level, everything as a service, and cloud storage and more as well as customer support

VOLUNTEERING AND COMMUNITY SERVICES

Google Developer Group Ajah (GDG AJAH) — Organizer

FEB.2017 - DEC. 2019

- I started the Google Developer Group Ajah February of 2018 with the aim of bootstrapping young and vibrant youth into picking up skills in tech. Initially Web and Android were the favorites amongst bundling newbies looking to improve their learning curve but thereafter we had as much Cloud enthusiast learning about enterprise cloud computing platform that is the GCP.
- I alongside passionate community volunteers had gone ahead in hosting several impactful <u>cloud study</u> <u>jam</u> workshops with over 30+ devs completed three Qwiklab Quest as a result of the workshop, thereby improving their technical depth as regards Cloud architectures on the GCP.
- My work at GDG Ajah had allowed me to partner with a local STEM and EDTech company known as <u>TechGen Africa</u> in training over 21 passionate tech newbies onsite for a 14 weeks MERN stack Software development Bootcamp known as TechGen Talent Lab.
- The biggest event in respect to the number of attendees (250) hosted by GDG Ajah was <u>DevFEST Ajah</u> 2019.
- It has been an honor to have founded and grew GDG Ajah to about 2.5K+ members on meetup.com, 150+ techies on WhatsApp with 19 in-person meetup events organized, 2 DevFest all hosted in the space of 2 years with an in-person meetup attendance of over 600 people. Beyond the numbers, the most important achievement for me is the experience we shared and learning many of us within the community got as a result of the various online and offline engagements, event meetups and networking that happened on the platform of GDG Ajah.

Trello Community Manager — Lekki Trello Events

JAN .2020-Present

- I voluntarily function as an event community manager who organizes and manages community-related events, activities, and agenda.
- Bringing together startup owners and product managers to Atlassian community events such as Trello,
 Jira, and Confluence work sessions
- Coordinating agendas and speakers for events.
- Building engagement among members (answering their questions, distributing newsletters, etc.)
- Promoting upcoming events through my networks.

<u>AWARDS</u>

NAIJAHACKS 2018 HACKATHON — Winner

OCT.2018

I was part of the team <u>Bioremote</u> that emerged overall winner of NaijaHacks 2018 Hackathon. Bioremote provides on-site medical diagnosis of patients living in poor and remote areas of the world..
